

STIC-IT FAST DRYING ASSEMBLY LUBRICANT

DESCRIPTION

STIC-IT is a fast drying assembly lubricant for tight fitting rubber and soft, pliable plastic parts being pressed into or pressed onto bushing cavities, pipe and or tubing. Examples would be situations such as handle grips, shock bushings, rubber hose to metal tubing, tires to wheels or rims, and a host of other applications.

After a short time of drying, the parts assembled will have a high resistance of coming apart or slipping out of place. *STIC-IT* dries clear so detection is minimal.

STIC-IT has outstanding corrosion protection and superior water resistance when dry.

STIC-IT makes no use of soaps, solvents, or petroleum for its effective lubricant properties so there is zero adverse degradation to the materials being assembled.

TYPICAL PROPERTIES

Viscosity 0.0091 poise at 25 °C

PH ~ 7

Biodegradable No

Solubility Soluble in Water
